🎓 EDUCATION

University of Chinese Academy of Sciences

2023 – Present

Undergraduate Student in Computer Science and Technology

GPA: 3.85

Rank: 17/86

CET-6: 558

Coursework: Natural Language Processing (93); AI Computing Systems (96); Lab of Operating System (93)

✂ TECHNICAL SKILLS

Languages: C, Assembly, Python, Verilog.

Tools: SSH, Git, Docker, L^AT_EX.

🔬 RESEARCH EXPERIENCE

Lab of Operating System

Fall 2025

- Developed a RISC-V operating system kernel through six lab assignments and advanced extensions.
- Implemented core services including process scheduling, virtual memory, a file system, and SMP support.
- Added interrupt handling, system calls, and an e1000 NIC driver for network communication.

Computer Architecture Lab & Labs of Computer Organization and Design

Fall 2025

- Implemented multi-cycle MIPS and RISC-V CPUs in the Computer Organization and Design lab.
- Co-developed a five-stage LoongArch pipelined CPU in the Computer Architecture Lab.
- Built the basic framework and integrated cache and AXI bus support into the pipeline.

LLM Jailbreak Autoresearch and Evaluation

Summer 2026 – Present

Collaborative Project

- Participated in analyzing LLM-as-a-judge evaluation protocols for JailbreakBench, StrongREJECT, and Harm-Bench.
- Contributed JailbreakBench integration and black-box autoresearch task configuration within a Harbor-based collaborative research framework.
- Supported reproducible, budget-aware robustness experiments with isolated hidden-set verification and recorded development-set results.

🏆 AWARDS

Triple-A Student

2024, 2025, 2026

Second-Class Academic Scholarship

2023 – 2024

Third-Class Academic Scholarship

2024 – 2025

👥 PUBLIC AFFAIRS

Officer, Department of Life and Culture, UCAS Student Union

2023 – 2024

Head of External Relations, Starry Sky Volunteer Association, UCAS

2024 – 2025
